</tbody>
</table>
| 406          | Internal temperature high           | Cool Invia Liberty pump down.   | Dressing:  
- Check dressing for air leakage. Press firmly around the edges of the dressing, around the drain tubing or on the Invia FitPad.  
- May apply additional film dressing to seal the leaking area.  
Connectors:  
- Ensure that the tubing connected to the dressing is connected properly to the canister tubing.  
- Ensure that the canister tubing is inserted straight into the pump.  
Canister:  
- Ensure that the canister is properly inserted, release the canister and reposition.  
- Ensure that the orange O-ring/gasket, placed beside the canister tubing on the pump is not missing. Additional O-ring is available via Medela representative. |
| 301          | Air leak in system                  | OK                               | Call your healthcare professional. |
| 302          | System clogged                      | OK                               | Recharge the battery either by placing the Invia Liberty pump in the docking station or plug in the charger to the electrical outlet port on the pump. Remaining time of battery is 15 minutes. |
| 305          | Battery empty                       | Charge battery                   | Change the canister, see chapter “Change canister” in the Quick Card or in the instructions for use. |
| 306          | Canister full                       | Change canister                  | Change the canister, see chapter “Change canister” in the Quick Card or in the instructions for use. |
| 313          | Filter clogged                      | Change canister                  | Restart the pump. If internal fault remains, turn off by pressing [ ] > 3 seconds ] and contact your healthcare professional. |
